AnyChange Glossary

Definitions

Application Programming Interface: A set of rules and protocols that allows software applications to communicate with each other.

Browser: A software application used to access websites and web pages on the internet.

Category: A grouping of products based on common characteristics such as product type, brand, or price range.

Cloud-Based Services: Software services that are delivered over the internet and hosted on remote servers, such as Amazon Web Services, Microsoft Azure, or Google Cloud Platform.

Consumer: In AnyChange concept consumer is defined as any buyer interested in specific general products in the AnyChange platform being neither a seller nor an e-commerce platform.

Courier: A third-party delivery service that handles the shipping and delivery of orders.

Customer: A user who visits the website with the intent to purchase/review products.

Database Connectivity: The ability of a software application to access and interact with data stored in a database.

E-commerce platform: Platform on which buyers and sellers and transaction relevant tasks and all other specific details are handled by the platform / company operating the platform.

Enterprise customers: Potentially, dynamically and strategically aligned customers with IMTSquare's business goals.

File Transfer Protocol: A standard protocol used for transferring files over the internet.

Graphical User Interface: A user interface that allows users to interact with a computer using graphical elements such as icons, buttons, and menus.

Landing Page: The initial web page that a user sees when they visit a website.

Network Protocol: A set of rules that governs how data is transmitted over a network, including protocols such as TCP/IP, HTTP, and HTTPS.

Responsive Design: A design approach that allows web pages to adapt to different screen sizes and resolutions, ensuring that the content is displayed properly on all devices.

Product: A physical or digital item that is being sold by a retailer or online marketplace.

Seller: A party who intends to sell a good on a platform.

Web Scraping: The automated process of extracting data from websites using software tools.

Abbreviations

API:	Application Programming Interface, see relevant item in Definitions
FAD:	Final as designed (usually level 4 and final documentation)
FAQ:	Frequently asked question(s)
FMCG:	Fast moving consumer goods
FTP:	File Transfer Protocol, see relevant item in Definitions
GDPPC:	Gross domestic product per capita
GDPR:	General data protection regulation
GUI:	Graphical user interface, see relevant item in Definitions
ICTA:	Information and Communication Technologies Authority
IFC:	Issued for comments (usually level 1 documentation)
IFD:	Issued for design (usually level 2 documentation)
IFI:	Issue for implementation (usually level 3 documentation)
HL / HLR:	High level / high level requirements
IP:	Intellectual property
LL / LLR:	Low level / low level requirements
NDA:	Non-disclosure agreement
QA/QC:	Quality assurance/quality control
RACI:	Responsible, accountable, consulted, informed
UP:	Unified process
UX:	User experience
V&V:	Validation and verification
