

No	Wed Material	Section	Page	Line/ No	Error Type	Importance	Explanation	Accepted	Correction Explanation
1	A	2. Architectural goals and philosophy	1	9	8	Medium	No solid goals were defined nor a set of philosophies were formulated to address these goals.	To be performed in Iteration 3	
2	A	3. Assumptions and dependencies	1	14	8	Little	Assumptions and dependencies are not properly listed.	To be performed in Iteration 3	
3	A	4. Architecturally significant requirements	1	20	4	Medium	Links or references from the Vision, Use Cases or SWRS are not provided.	To be performed in Iteration 3	
4	A	5. Decisions, constraints, and justifications	1	24	4	Important	Justifications and possible alternatives are not provided.	To be performed in Iteration 3	
5	A	6. Architectural Mechanisms	1	36	4	Important	Architectural mechanisms are not properly provided.	To be performed in Iteration 3	
6	A	7. Key abstractions	1	41	4	Important	Key abstractions are not properly provided neither by list or model.	To be performed in Iteration 3	
7	A	8. Layers or architectural framework	2	46	4	Medium	Neither layers or architectural framework are properly described.	To be performed in Iteration 3	
8	A	9. Architectural views	2	52	8	Medium	The provided diagram is vague and does not explain much.	To be performed in Iteration 3	
9	A	9. Architectural views	2	52	6	Important	The provided diagram does not comply with the MVC model as it is missing the Model and View parts.	To be performed in Iteration 3	
10	D	N/A	1	1	9	Medium	The document does not have a version history, headers and footers, ToC, cover page, etc.	To be performed in Iteration 3	
11	D	Subsystems	2	14	8	Medium	Couldn't get the point why an extra entity as PriceSource is required.	To be performed in Iteration 3	
12	D	Requirement Realization	2	25	6	Important	Use cases assigned in the Work Item List (UC-2, UC-6 and UC-8) are missing	To be performed in Iteration 3	
13	D	Requirement Realization	2	25	2	Important	The sequence diagrams does not comply with the OAuth2.0 protocol which is defined as the security measure for user authentication in the SWRS document.	To be performed in Iteration 3	
14	D	Requirement Realization	3	32	8	Medium	Couldn't get which UC the Confirmation Process refers to.	To be performed in Iteration 3	
15	TC	N/A	1	1	6	Medium	Use cases assigned in the Work Item List (UC-6 and UC-8) are missing	To be performed in Iteration 3	Note: The 2 UC's are detailed per the assumption that 2 test cases are to be detailed
16	TS	N/A	1	1	6	Medium	Use cases assigned in the Work Item List (UC-6 and UC-8) are missing	To be performed in Iteration 3	Note: The 2 UC's are detailed per the assumption that 2 test cases are to be detailed
17	I	N/A	N/A	N/A	2	Little	Pushing each document with a version number makes it difficult to track documents. Instead, using version history in the documents is enough.	Rejected	The latest versions of the documents are to be pushed and uploaded for convenience
18	I	1.Key Milestones	3	17	6	Medium	Although UC-5, UC-3, UC-4, UC-9, UC-7 are provided in this table, their status are still "In Backlog" in Work Items List document.	Accepted	Corrected as "assigned"
19	I	3. Work Item Assignments	3	26	4	Little	Although it is the plan or iteration 3, the statement is provided for iteration 2.	Accepted	Corrected as required.
20	TS	Test steps	N/A	N/A	9	Little	It would be more accurate to write test steps in the form of orders.	Accepted	The steps are rephrased.
21	TS	Test steps	N/A	N/A	3	Important	Test steps should be more clear. For example the data used while testing must be stated. Tests should be able to be run without interruption.	Rejected - accepted the convention for steps as above	The steps are rephrased.
22	W	N/A	1	N/A	8	Important	There is no work item assigned for iteration 3. Hence, it is not understood that which of these are planned to be included for iteration 3.	Accepted	Corrected as "assigned"
23	U	UC-4 (Manage Payment Information)	5	1	3	Medium	Standart user is stated as one of the primary actors. It is not clear that why this user manages payment since this type of user is assumed to be free.	To be performed in Iteration 3	
24	TC	N/A	N/A	N/A	8	Medium	It is stated in work items list, and iteration plan 2 that UC-1, UC-2, UC-6, UC-8 are implemented, however test cases for UC-8 and UC-9 are neither exist nor planned.	To be performed in Iteration 3	Note: The 2 UC's are detailed per the assumption that 2 test cases are to be detailed
